

AUTEC Provides Customers With Everything Necessary To Be Successful In The Car Wash Business

Back in 1981 when **AUTEC, Inc.** was founded, the average car owner spent several hours each week with bucket, soap, water, old towels and elbow grease cleaning his car.

Today, car owners world wide are throwing in the towel for more convenient and environment friendly alternatives to hand washing.

Whether petroleum marketer, auto dealer, quick lube operator, self-service or full-service car wash operator, or intrigued investor, **AUTEC Car Wash Systems** provide profitable systems & solutions in your specific market that enable you to meet the needs of today's car washing public.

Since day one, our philosophy has been...*"to be successful, we must first make our customers successful!"* Car washes can only be profitable with exceptional cleaning performance that keeps customers coming back. AUTEC Car Wash Systems not only consistently meets these standards but does so with the lowest operating cost in the car wash industry.

AUTEC has grown from a fledgling company operated out of its founder's basement to a multi-million dollar corporation occupying over 103,000 square feet in the industrial section of Statesville, North Carolina.

AUTEC's facility encompasses marketing and graphic design, research & development, engineering & drafting, welding & metal fabrication, paint & surface preparation, electrical, assembly, technical service and a complete chemical blending, formulating and packaging operation.

"AUTEC's customer base includes marketers of every major brand of gasoline in the U.S., auto dealerships of every franchise sold in the U.S. and Europe, and independent quick lube and carwash owners nationwide."

Tom Hobby, AUTEC President
